

Wafer valves from DN50-DN900 (2"-36")

FlowCon offers flanged wafers in DN50, DN65 and DN80 (2", 2 1/2" and 3") with the AHU Wafer and from DN100 (4") and up with the wafer.

As the latest addition FlowCon now offers DN900 (36") wafer mounted with 97 pcs. 3" SS-cartridge and with all hi-flow cartridge the maximum flow through is:

FlowCon Wafer DN900 · 36"	
Pressure range: 35-220 kPad · 5-32 psid	
Max. flow m ³ /hr	Max. flow GPM
4.404	19.400

This size has already been sold to a district cooling project in the Middle East in a greater number.

In total FlowCon now offers dynamic balancing valves from DN15-DN900 providing flow rates from 40 l/hr to 4.404 m³/hr (0.176 GPM to 19.400 GPM) which ought to suit the majority of all projects requiring dynamic balancing.

For further information please see the FlowCon Wafer tech-note and installation instruction.
